USING A DECISION SUPPORT DATA SYSTEM FOR CONTINUOUS IMPROVEMENT PURPOSE

Access to the right types of data at the right time is critical to guide decision making and continuous improvement of implementation of evidence-based programs/evidence informed programs (EBPs/EIPs). In this webinar, participants will deepen their knowledge of the key components of an effective data system, see examples of how data can be used for continuous improvement of implementation efforts, and have an opportunity to assess their current data systems.

By the end of the session, participants will have/be able to:

- Deeper knowledge and understanding of the key functions of an effective Decision Support Data System (DSDS)
- Assess their current data system to identify strengths and areas for planning to improve their DSDS

FRIDAY, MARCH 6TH
12:00 PM - 1:30 PM
